

is health care a **human right**?

[a faithful conversation about health care reform]

Thursday, October 8
St. James United Church of Christ
10 East Broad Way, Lovettsville
7:30 pm

Thursday, October 15
Thomas Balch Library
208 West Market Street, Leesburg
7:30 pm

...as **people of faith**, how do we approach the current crisis in health care?

"Give us this day our daily bread.."

Is health care a *human right*, or a *commodity* to be bought and sold for profit?

Am I my brother's keeper, or are we each responsible only for our own lives?

What do we value more?

...individualism, or community - the common good?

Could our ailing health care system use a dose of **socialized medicine**?

What would our health care system look like if it took seriously the values and vision of **The Reign of God** taught by Jesus of Nazareth?

...some say that this can only mean neighbors helping neighbors...what about the role of government?

...what other questions should we be asking?

We will be sharing some video clips and excerpts from programs that have been part of the national discussion around health care reform. We expect to have a representative from *PHYSICIANS FOR A NATIONAL HEALTH PROGRAM* and have invited others who oppose what they understand to be *government-run health care*.

All in the community are invited to come and share perspectives.

Health Care Is A Human Right
